Education

Sai Gon University, Information Technology Department, Majoring in Software Engineering.

Experience

I have experience working in teams and have previously managed a team consisting of 4-5 members.

Skills

- I know how to use programming languages such as C/C++, Python, Csharp, HTML/CSS/Javascript, and Java.

- I am proficient in building databases using tools such as MySQL, SQL Server, NodeJS, and Firebase.

- I have the ability to learn and become familiar with new languages or technologies quickly.

Projects

Managing a supermarket

- Managing products in the supermarket warehouse.

- Managing employee login for the store.

- Access control permissions for employees.

Managing a laptop store

- Designing the database for the app.

- Design an Entity-Relationship Diagram (ERD) for the store.

- Managing employee login for the store.

- Managing inventory entry into the warehouse.

Tourism-serving website

- Designing the user interface for the website.

- Managing the shopping cart on the website.

Hobbies

- Play Chess: Elo rating below 1000, not exceptionally skilled but knowledgeable about the game.

- I enjoy playing games in my spare time, particularly turn-based and open-world games.
